Sir MA 9/10

SIR,

Subject: Formation of a sub Committee for considering the tenders for sewage treatment plants for northern outfall works, Mysore.

In pursuance of the resolution No.205 dated 29-9-1954 passed by the Trust Board, re: the above subject, it is proposed to constitute a sub Committee consisting of experts for considering the tenders received for the work of erection of mechanical sewage treatment plants for the northern outfall works, Mysore, as the subject is a very highly technical one and requires a comprehensive study. The Board recommended the marginally** noted members for the Sub Committee with powers to co-opt additional members, under the Chairmanship of the Chairman, Trust Board, with the Trust Board Engineer as the Convenor and Secretary.

**

Members of the Sub Committee:
1. Chairman, C.I.T.Board, (Chairman),
2. The Director of Public Health in Mysore,
3. Superintending Engineer, Sanitary Circle,
4. Sri N.Krishna Iyengar, B.E., M.I.E., (Retd.Supdt.Engineer), Trustee,
5. The Commissioner, City Municipality,
6. The Government Architect,
7. Trust Board Engineer (Secretary).

As the tenders have to be decided very urgently approval of Government for the formation of the Sub Committee with powers to co-opt additional members, may kindly be communicated early.

A copy of the Board resolution and the office note regarding the tenders received for the work, are herewith enclosed for kind reference.

Yours faithfully,

S. Linganna. 4/10/54
(S.Linganna)
Chairman.

MYSORE CITY IMPROVEMENT TRUST BOARD.

Office note re: disposal of tenders for the mechanical sewage disposal plant of three million gallon capacity at the northern outfall, Mysore.

As a part of the northern outfall works for which an estimate for Rs.6,00,000/- has been sanctioned, mechanical installations for the ~~disposal~~ disposal and treatment of sewage at the outfall works are proposed. In the sanctioned estimate, there is a lumpsum provision of Rs.1,73,000/- which was originally intended for an ordinary septic tank. To adopt a more modern method of disposal which will be free from the human factor of handling the harmful sewage, it is proposed to instal a mechanical plant, on the lines adopted at Bangalore for one of the outfall works. A set of specifications for the mechanical units involved was got up and some firms which are dealing with such machinery were addressed to submit their tenders and the drawings. The notification was also published in the Mysore Gazette dated 22nd and 29th April 1954, calling for tenders for the work. In response to the tenders, four firms have forwarded their tender with their individual opinion regarding modifications and alterations and also stating the merits of their respective plants. In the enclosed comparative statement "A", the total amount as quoted by each firm has been shown and regarding the details of the works involved according to each firm, a separate note has been put up for further examination.

After the first set of tenders were received from the firms, they were studied in detail and the firms were contacted againfor certain clarifications in respect of their tenders. Subsequently some of the representatives of the firms also called on this office and personally explained their views and also the details of the working of their plants. As a result of the discussion, it was found necessary to get revised or modified quotations from the firms and accordingly, the last date was fixed on 16-8-1954. Out of the 4 firms, three firms have sent their modified tenders and the other firm viz..

P.T.O.

(3)

Messrs. Standard Machinery & Co., Bangalore, have informed over trunk call on 16-8-54 that they are in touch with their principals at London and that they require time till the end of August 1954 for sending their quotations. (Note: The firm has since submitted the modified tenders).

Apart from the comparative statement of the financial implications, a comparative ~~&~~ picture of the mechanical units and their functional variations and the data assumed for the design in various plants etc., has also been shown in the second statement "B". From a close study of the comparative statement "B", the PROS AND CONS connected with each type of plant could be clearly understood. As the installation of such mechanical plant for the outfall works is the first of its kind in these parts, and as the undersigned is unable to give his decisive opinion regarding the suitability of any one of the plants, it would be very necessary to have a first hand knowledge by contacting some of the Corporations or Municipalities where such plants are working. It is learnt that Messrs. Dorr Oliver & Co., Bombay, have installed a 9 M.G.D. plant at Dadar, Bombay and it is very satisfactorily working from the commencement. The same firm has also completed a bigger plant of 18 M.G.D. at Delhi. Hence it is suggested that a responsible Officer be deputed to visit the plants that are working and know their working condition, and to find out the experience of the users, and get first hand information before a final decision is taken in the matter. The opinion of the Trust Board is solicited for taking further action in the matter

In this connection, it may also be stated that a reference was made to the Trust Board, Bangalore, where a similar sewage treatment plant of higher capacity (3 M. G.D) is proposed to be erected. The estimated cost of the Bangalore plant is Rs.4,45,000/ and the lowest tender received for that work is Rs.6,58,750/- which is stated to have been accepted by Government. A comparative statement of different tenders received for the Bangalore plant is also herewith enclosed.
